Little World Beverages to distribute Aspall cider in Australia

20 March 2007

Little World Beverages announces that it has commenced the distribution of Aspall cider in Australia. The company is pleased with the relationship it has established with Aspall, the oldest direct lineage cider maker in the United Kingdom. Aspall has been producing premium cider in England since 1728 as a family owned and operated business. This product is consistent with the company's focus on the production and distribution of premium products. The cider market in Australia is in its infancy and our relationship with Aspall will enable the company to explore different opportunities for growth in the sector in the coming years.

Little World Beverages is also pursuing the development of its own cider brand which it expects to launch later this year.
